DETAILED ACTION

Preliminary Amendment

1. Preliminary Amendment filed 1-16-2004 is noted by the examiner.

Prior Art Cited

2. Although the prior art discloses several claimed limitation, for example: Broos et al (U.S. Patent 5,418,259) discloses a process of preparing polyurethane polymers by reaction of an isocyanate composition having an isocyanate equivalent weight of from 180 to 300 and comprising in from at least 50 weight percent a prepolymer, with an active hydrogen-containing substance in the presence of water which provides for at least 50 mole percent of the total blowing requirement. The prepolymer is obtained by reacting a molar excess of a polyisocyanate comprising, in from at least 70 weight percent, 4,4'-methylene diphenylisocyanate with an isocyanate-reactive composition containing a branched diol or triol having a molecular weight of from 60 to 300, and (b) a polyoxyalkylene polyol or mixtures thereof having an average functionality of from 2 to 4 and a molecular weight of from 3000 to 12000, wherein the parts by weight ratio of (a):(b) is from 0.01:1 to 0.25:1.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Art Unit: 2863

Authorization for this examiner's amendment was given in a telephone interview with Janice Vatland on February 12, 2005.

The application has been amended as follows:

In claim 31, line 1, replace 24 with 26.

Allowable Subject Matter

4. Claims 26-31 are allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

Independent claim 26 contains allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claim 26:

The primary reason for the allowance of claim 26 is the inclusion of the method for compositional analysis of chemical unit of a sample polymer including comparing the modified polymer to a reference database of polymer of identical size of polymer. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 27-31 are allowed due to their dependency on claim 26.

Art Unit: 2863

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
